Very interested	6	35
Casual interest	10	59
Not interested	1	6
Not worthwhile	0	

10. Specific feedback on short courses or 2010 meeting them or open feedback	responses (9 total)
I enjoyed the analytical short course. There were some interesting and important discussions during the class. I think it would be even more beneficial if we can make this to a full-day class. It will allow more time to cover specific areas and Q&A sessions.	SQO course was the greatest short course I have ever attended
Climate change and effects on contaminant bioavailability and metabolism	Pop Modeling in Eco risk assessment – instructor said we should have computers, but I didn't see a notice of that when I registered
Need to give prerequisites or required level of knowledge for short courses and needed equipment	Dinner meetings on weeknights never work. Can't we have them on Friday evening or Sunday afternoon?
Endangered species	Environmental chemistry, environmental forensics
I bounce between sessions and having to hold questions until the end of the sessions does not allow me to have my questions answered
